All About Electronics

All about Electronics is a type of workshop which sets the students to create the Passion of Learning Electronics with understandable and adaptive techniques. This will help the students to gain the fundamentals in Electronics along with application and usage of components in different circuits.

- **Introduction to Electronics**
- **Voltage, Current and Power**
- **Basic Components**
- **Breadboard connections**
- **How to use Multimeter**
- **Testing with Multimeter**
- **Parallel & Series connections with LED**
- **2 Mini Projects**
