RC Aircraft Design Workshop

This workshop gives you an opportunity to understand the theory behind the functioning of aircraft and aircraft design. It makes you innovate by coming up with your own design of an RC aircraft and fabricating it from scratch. An interactive lecture session and design session helps you design your own aircraft.

- **Design, Build & Test your first RC Aircraft from scratch!**
- **Learn all the introductory concepts of aeronautical engineering through aero modelling**
- **Introduction to Design Algorithm of an aircraft**
- **Basics of Flight & Aeronautics**
- **Different Systems in an Aircraft**
- **Stability & Control of an Aircraft**
- **Instrumentation in an RC Aircraft**
- **Hands-on experience on the electronic and electrical instrumentation of an RC aircraft**
