Soldering & PCB

Soldering is one of the most fundamental skills in the world of electronics. This workshop Caters to students of any level – whether you're a beginner or already comfortable with designing circuits and making basic PCBs.

- Introduction to Soldering
- Soldering Components on Dot PCB
- Soldering tracks on Dot PCB
- Introduction to easy EDA
- Easy EDA tools
- Designing of Schematic & PCB
- Tool selection for milling
- Sending G-Code CNC machine & Milling PCB
